DRILL

1. Incident Name

SONS 2010-NNE-Exercise

2. Operational Period (Date / Time)**From:** MAR 25 10 06:00 **To:** MAR 26 10 06:00**INCIDENT OBJECTIVES
ICS 202-CG****3. Objective(s)**

- Ensure safety, security and welfare of citizens and response personnel, and ships crew as well as maximize protection of public welfare.
- Control the source and minimize the volume released.
- Continue to provide protection of environmentally sensitive areas including wildlife and historic properties.
- Maximize efforts to effectively contain cleanup; recover and dispose of spilled product.
- Identify threatened species; recover and rehab injured wildlife.
- Investigate the potential for and if feasible utilize alternate technologies to support response efforts.
- Continue to assess damage and stability; develop and implement salvage plan for M/V TETRA.
- Continue to assess damage and stability; develop and implement salvage plan for M/V AXIS MOONLIGHT.
 - Lightering Plan
 - Salvage Plan
 - Containment Plan
- Assess potential port and waterways impacts and develop strategies to mitigate adverse effects and speed recovery.
- Maintain safety zone and air restriction that accounts for vessels and oil on water.
- Execute the robust plan to keep the public, stake holders, and media informed of response activities, including social media outlets to provide accurate, consistent and timely information to the media and public.
- Execute volunteer plan for affiliated trained volunteers.
- Transition offshore recovery to Sector Boston.
- Develop a reasonable worst case plan and strategies to deal with it.

4. Operational Period Command Emphasis (Safety Message, Priorities, Key Decisions/Directions)

- **Priorities:**
 1. Safety of responders and the public.
 2. Minimize adverse impact on the environment.
 3. Prevent further discharge from either vessel, including vessel stability and transit plan.
 - Remove fuel from Axis Moonlight
 4. Restoration of the transportation infrastructure / maritime commerce.
 - Transit and decon plan created for river.
 5. Comprehensive / coordinated communications. Strategy includes: internal, external, and community relations
 6. Minimize further impacts to property.
 7. Investigation of cause.
- **Limitations and Constraints:**
 - Heavy Weather
 - Social media networking sites - bring back through JIC
 - Funding - both federal and RP funding
 - Resources / Logistics - Area Command to clarify resource ordering process
 - Politics
 - Media - Coordination with Area PIO
 - Potential Activists and police support

 See the Disposal Plan in Documentation

8. Special Instructions
CLEANING PROCESS
 All recovered water will be decanted via the Decanting Approval Plan. The final disposal of wash water, oiled sorbents and materials will be accomplished in accordance with the Disposal Plan. Actual pressure washing, if required will utilize a hot/cold pressure washer with a temperature range up to 220 degrees F and a pressure rating up to 3000 psi.

All personnel involved in the cleaning operation will wear modified PPE level D including rain gear, gloves, rubber boots, and eye protection (face shield and safety glasses). In addition, any personnel working with the arch of an overhead crane or travel lift will wear a hard hat. Once the piece has been determined clean to the accepted standard, the equipment is transferred to the designated "clean" holding area.

- Call 877-OIL BIRD (DRILL X4062) For all Live and dead seen Please have a location of The spotting DO NOT TOUCH Live or dead animals.

7. Work Assignments

On Water Recovery

- Vessels are to skim in heaviest concentrations of oil as directed by the surveillance craft.
- Reports are to be made at 1200 and 1700 to the Branch Director concerning amount skimmed and storage available.
- Whenever possible, conduct all maintenance and support functions at night so as not to interfere with day time skimming operations.
- Gross removal of oil only.
- All personnel are to attend a site specific safety meeting prior to the days work or performing a task outside the parameters of their normal scope of work.
- Maintain situational awareness and communications with other vessels and equipment working in adjacent areas.
- Call 877-OIL BIRD (DRILL X4062) For all Live and dead seen Please have a location of The spotting DO NOT TOUCH Live or dead animals.

8. Special Instructions

- Maintain guidelines set forth in the Site Safety Plan.
- All personnel are to wear personal flotation devices (Mustang Suits) while working on or next to the water.
- Report all incidents and accidents to the Safety Officer or to his or her field representative as soon as practical.

ME Marine Animal Report Hotline: 1-800-532-9551

7. Work Assignments

Deploy the following Geographic Response Strategies:

A-40-1 York River
 A-39-1 Brave Boat Harbor Harbor
 A-41-1 CAPE NEDDICK

- All boom in populated areas must be lighted during the night.
 - Place multiple layers of boom where needed due to heavy currents. If needed, line boom with absorbents.
 See attached 204a for strategy implementation.

- Call 877-OIL BIRD (DRILL X4062) For all Live and dead seen Please have a location of The spotting DO NOT TOUCH Live or dead animals.

8. Special Instructions

- Maintain guidelines set forth in the Site Safety Plan.
 - All personnel are to wear personal flotation devices (Mustang Suits) while working on or next to the water.
 - Keep the possibility of vessel traffic in mind when placing boom.

DRILL

ICS 208 Site Safety Plan

Incident Identification

Incident Name: SONS 2010-NNE-Exercise

NRC #:

Site Information

Incident Location: 15 Miles East of Portland Lighthouse

Latitude: 43.5268° N

Longitude: 69.9008° W

Command Post Location: Portland Maine

Control Zones are indicated on the Site Map and identified by:

Exclusion Line: Within 100 Mtrs. of Tetra and Axis Moo... (Hot Zone)

Contamination Control Line: (Warm Zone)

Support Line: (Cold Zone)

Weather Conditions

Air Temp: 40 °F

Water Temp. 30 °F

Ceiling: 10000 Feet

Visibility: 1-2 Miles

Wind Direction: NW 23° Heading

Wind Velocity: 25 knots

Seas: 2-3 Feet

High Tide Time: 18:43

Current Direction: NW

Current Speed:

Organization

Incident Commander: Bruce Johnson

Deputy IC:

Operations Chief: Billy Powell

Safety Officer: Ray Dixon Shell

Planning Chief: Steve Addison

Source Control:

Site Access Control:

Logistics Chief: Bob Gulick Shell

Liaison: Sector NNE

PIO: Fred Palmer Sector NNE

Hazard Evaluation

Chemicals Involved: Gasoline Crude Oil Diesel Mayan Crude

Source: Uncontrolled Controlled Material: Uncontained Contained

Physical Hazards: Flammable Liquid (Flash Point < 140F)

Combustible Liquid (Flash Point > 140F)

Lower Explosive Limit - LEL (Max = 10%)

Toxicity: Benzene (PEL = 1 ppm) Total Hydrocarbons (PEL = 300 ppm) H2S (PEL = 10 ppm)

Carbon Monoxide PEL = 35 ppm Other PEL = ppm

Other PEL = Other PEL = ppm

Material Safety: Material Safety Data Sheet (MSDS) attached

Monitoring

PassPort 3 Gas Monitor Device Type

- Oxygen %
- LEL %
- H2S ppm

MMS 4 Gas Device Type

- Oxygen %
- LEL % or Total Hydrocarbons ppm
- H2S ppm
- Carbon Monoxide (CO) ppm

Drager Tube Device Type

- Benzene ppm
- Toluene ppm
- C8 Aromatics ppm

1 ppm Detect within 25 ft of M/V Tetra

- Benzene ppm
- Other

Total Hydrocarbons ppm

Other Monitoring Issues:

Air monitoring will be conducted prior to any operations.

Vessels entering Control Zones - Exclusion Line will require separate safe entry permit and special air monitoring.

All vessels approaching M/V Tetra and M/V Axis Moonlight will require a separate hot zone entry permit including specific air monitoring requirements.

- All personnel to follow Shell Life Saving Rules (see attachment)

-All personnel to follow PPE requirements listed in the Site Specific Safety plans (see attached)

-PPE Requirements for working within 25' ft of Tetra vessel - need 1/2 mask Air Respirator with OVM cartridge and Mustang Suit.

MAR 24 10 13:56

DRILL

ICS 208 Site Safety Plan

Page 2 of 3

Respiratory Protection

Guidelines

No Respiratory Protection

- Benzene is not present
- Total Hydrocarbons <= 150 ppm (= 50% PEL)

½ Mask Organic Vapor Respirator (Black Cartridge) - Maximum Protection Factor = 10 x PEL

- Benzene Levels <= 7 ppm
- Total Hydrocarbons <= 2100 ppm
- Do not use if H2S levels >= 10 ppm

Full-Face Organic Vapor Respirator (Black Cartridge) - Maximum Protection Factor = 50 x PEL

- Benzene Levels <= 35 ppm
- Total Hydrocarbons <= 10,000 ppm (Do not exceed 10% LEL!)
- Do not use if H2S levels >= 10 ppm

Self Contained Breathing Apparatus (SCBA)

- Low Oxygen Levels - <= 19.5%
- Benzene >= 35 ppm
- H2S levels >= 10 ppm (Do not enter any area that exceeds 100 ppm H2S)
- Do not enter any atmosphere that exceeds 10% LEL)

! Initial Entry - Site Reconnaissance - Verification of Hot Zone

Entry Team & Back-up Team(s)

- No Respiratory Protection Needed
- ½ Mask Organic Vapor Respirators
- Full-Face Organic Vapor Respirators
- Fresh Air - Air Line System (with escape pak)SCBAs

Decon Team(s)

- No Respiratory Protection Needed
- ½ Mask Organic Vapor Respirators
- Full-Face Organic Vapor Respirators

Protective Clothing

| <input checked="" type="checkbox"/> Standard Hydrocarbon Release PPE <ul style="list-style-type: none">• Tyvek Coveralls• Inner Gloves• Nitrile Gloves• Rubber Boots | <input checked="" type="checkbox"/> Other <ul style="list-style-type: none">• Hard Hat• Safety Glasses• Personal Flotation Devices |
|---|--|

Decontamination

Contamination Reduction Corridor Established

Decontamination Set-up Utilized:

- Dry Decon 3-Pool Soap & Water -(Full Decon) Sanitary Facilities & Lighting Available

Special Decontamination Procedures for Personnel and/or Equipment:
Maintain three points of contact while donning and doffing gear.

Health

Status of Personnel: Accounted for 0 Missing 0 Injured 0 Dead 0

Emergency Medical Services and transportation provided by: Local EMS - 911

Closest approved medical facility is:

 Name: Maine Medical Center * (See ICS-206 for further guidance)

 Location: 22 Bramhall St, Portland, MA 04102

 Telephone Number: 207-662-0111

Entry and Decon workers wearing protective clothing will have medical monitoring conducted (Vitals)

Heat Stress Monitoring will be conducted while working in elevated temperatures

DRILL

ICS 208 Site Safety Plan

Page 3 of 3

Emergency Procedures

Rescue: In the event that rescue of Entry Personnel is required, entry shall not be made until the Entry Team Leader and the Safety Officer provide consent or 911 shall be called.

Evacuation/Escape Alarm: Five short whistle blasts

Evacuation/Escape Route and Location: Upwind

Training

- All Employees shall have the required training and medical clearances to work in a Hazwoper event and to wear the assigned protective equipment.
- All Contractors shall provide documentation of the required training and medical clearances to work in a Hazwoper event and to wear the assigned protective equipment.

Plan Review

- All Personnel working within the control zones (Hot, Warm & Cold) shall receive a site orientation and shall be familiar with all provisions of this plan.
- A documented safety meeting shall be held prior to entry into the Hot Zone with the Entry, Decon and Back-up Teams.
